# BANKING AND BILLING WITH EASE

Xero's intuitive invoice entry means you can enter your invoices quickly and efficiently, whether you are creating an invoice for one or many items.

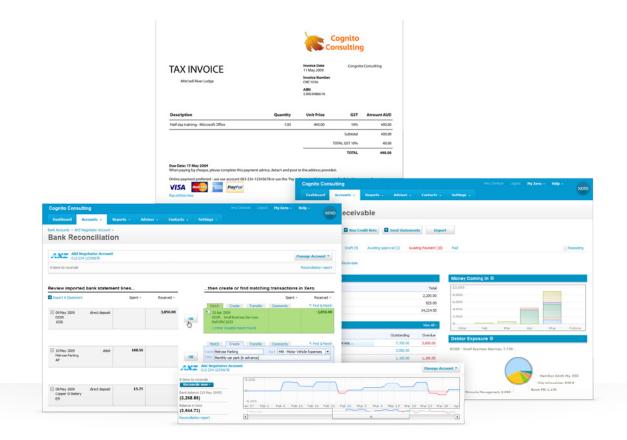

- You can create a schedule to automatically generate invoices on a regular basis saving having to enter the invoice manually every month.
- You can email formatted invoices directly to customers from within Xero and you can choose to email a copy to yourself.

Xero has made bank reconciliation easy and fun. You can automatically import your bank statements into Xero daily, so you don't waste time downloading and uploading bank files manually.

• Automatically import your bank statements into Xero for ANZ, Commonwealth Bank, and NAB banks.

"Being online and available from anywhere is a major factor, so whether I'm in Australia or New Zealand I can still keep an eye on the businesses."

### **RICHARD DRYDEN,** *FITAUS*

## MANAGE YOUR PAYABLES

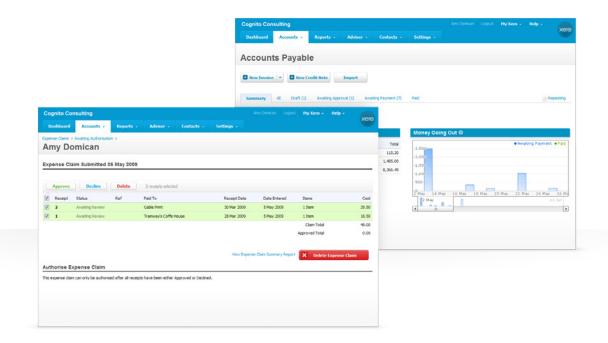

Keeping on top of your payables has never been easier. Xero lets you track where your money is going and why.

#### You can:

- See all your outstanding invoices at a glance.
- Set up repeating payables invoices for regular suppliers.
- Approve workflows that can be shared to relieve the business owner.
- Enter receipts for your expense claims as you collect them, or all in one go.
- Choose to pay part or all of a claim, and you've got all the information about the claim on hand to help make the decision.
- Approve or decline each receipt in a submitted expense claim. The entire expense claim can then be authorised.

"It is blissful simplicity and intuitive intelligence at its best. Xero makes accounting easy and – as hard as it is to believe – fun! The client interface is sexy and professional and even when I do make mistakes my accountant can easily untie the knots"

## SECURE AND PRIVATE

Xero stores all your accounting information on highly secure corporate grade servers and that are automatically backed up.

To further protect access to your data, only give access to those you trust. Xero means you can collaborate with your financial advisor in real time to have better control of your finances.

- Control who had access to your data and what they see, with tiered user permission levels and records of when a user last logged on.
- Give employees access to creating invoices and expense claims, but not to your bank accounts and reports.
- Invite your accountant in they can log in and view your accounts, providing valuable real-time advice.
- Lock accounting periods to close off a tax period, and prevent others changing your data.
- Eliminate emailing or sending around vital data on a disc insecurely.
- Be assured your data is safe. Unlike desktop applications, data isn't stored on your computer, so your data isn't compromised if it is lost or stolen

"Xero has alleviated the pressure from me. Because I was the only one that did the books we suffered from key person risk as well as data security risk."

I think I may love Xero a bit too much. It's addictive. And fun. Which for an accounting system must be unusual! 9:26 PM May 4th from MoodBlast
